

DESCRIPTION OF ALIAS CODES IN MESSAGES

When messaging in Lapiro software you can choose from a variety of alias codes that pull information directly from your participant database. Below is a basic user guide for these codes.

MAIL

Email: This will copy the participant email*

*This is not used much

Name: This will copy the participants full name

First name: This will copy the participant's first name only

Last name: This will copy the participant's last name only

Club/Team: This will copy the club or team the participant has submitted during registration

Bib: This will copy the participant's bib number – you should not use this if you haven't uploaded bib & chip numbers yet*

*Very useful just before race day

Chip – will copy your chip number. This one is only usefull if you do races where the participants enter own chip.

Category : This will copy the participant's category

Athlete-link: This alias code will insert a link, so the participant can sign up for Facebook/ Twitter notifications. This link can also be shared, so friends and family can also follow this participant.

LIVE MESSAGES

Below is the default information sent for each timing point:

{[part.name](#)} is racing {[event.name](#)} and have completed {split.distance} in {split.time}

If you want to edit this text, copy these {xxx} into you own text.

Example:

{part.name} is racing {event.name} and have completed {split.distance} in {split.time}
This race is sponsored by www.lapio.com

If you need additional help, contact Lapiro support at hey@lap.io.
